MRNAK

We are excited to once again welcome you to the Mrnak Ranch 58th Annual Production Sale.

As many have noticed we have changed the sale date from February into January this year. This was to allow us to have some time between the sale and calving season. The bulls that are purchased on sale day can remain at the ranch until mother nature allows us to deliver at a time closer to breeding season. All the bulls will have a full fertility examination before we deliver in the spring.

We truly enjoy producing Hereford cattle that work for operations in all areas of the livestock industry. It has been our passion to raise high-quality Hereford cattle that can grow, produce, and thrive in any conditions. This year's sale offering is no exception. We are confident that only the top performance bulls will be offered on sale day and are ready to go to work in any location. We continue to use proven sires that give us the results we demand along with using some exciting new herd sires to build our maternal base.

We are driven to produce bulls that are structurally correct, rugged, long bodied, and uniform. As producers, we strive to produce high-quality seedstock with reliable genetics that yield offspring that are vigorous at birth, efficient in converting grass to high weaning weights, all while exhibiting a phenotype that one can take pride in having in their pasture. Our cows undergo constant evaluation for efficiency, sound feet and legs, and udders that require no assistance.

This group of bulls in our opinion is as good as we have ever offered. The bulls have been raised slowly as yearlings and developed throughout the summer on grass. Regular culling occurs multiple times a year based on structure, disposition, performance, and phenotype. There are bulls from the front of the sale order to the last bull that walks in the ring that can provide benefits to any commercial cow/calf or premier Hereford seedstock operation.

If possible, stop in and walk through the sale offering before the sale. We would love the opportunity to show you the mothers of the bulls as well as the rest of our cows and operation.

Please join us on Monday night for a steak supper and fellowship at the Sweetwater Golf Course starting at 5pm.

Thank you for taking the time to look at our offerings and look forward working with you in the future.

— Terms & Conditions —

- All terms will be cash unless credit is arranged before the sale.
- Each animal will be sold to the highest bidder. Bidding disputes will be settled by the auctioneer.
- Health Certificates will be furnished.
- Animals sold will be fed and cared for at purchaser's risk for a reasonable length of time, or will be loaded and shipped as instructed.
- Bulls are guaranteed breeders. All claims must be submitted in writing to seller within eight months of sale date, along with semen evaluation and health report, at buyer's expense, from veterinarian. Seller shall have the privilege of trying bull after his return before making any adjustment. This guarantee is void if there is evidence of improper management in caring for the animal or the bull's inability to breed is due to sickness or injury which incurred after being sold.
- According to information available from the American Hereford Association and from our own experience, all our registered cattle in this sale are I.E. and diluter free. No further guarantee is implied.
- Any changes of information as it appears in this catalog will be announced at time of sale and such announcements will take precedence over printed matter in this catalog.

• **HEALTH:** These bulls are from a herd free from any known infections or contagious diseases or physical abnormalities. Dr. Johnson of West River Vet Clinic has been in charge of the health of the herd.

For EPD and Performance Trait Full Descriptions, visit Hereford.org

— Delivery —

Free delivery to central points. We will do our best to get them as close to your doorstep as possible. We will work out transportation arrangements for anyone, nationwide and internationally. Delivery will take place in February and March unless special arrangements are made. No delivery on commercial lots, but we will coordinate transportation for buyer if necessary. All cattle left at Mrnak's to feed must be fully insured.

— Guarantee —

As always the bulls are fully guaranteed to be sound breeders for the first breeding season. Additionally, all females are guaranteed to be breeders under the guidelines of the American Hereford Association.

MRNAK

- What we do -

At the Mrnak Ranch, we strive to be more than a seedstock operation. We are continually building a diverse farming, ranching and feeding operation that functions full circle to support each endeavor. Our embryo transfer program helps us ensure consistency in our cows and sale bulls. We carefully select proven cows with key breed characteristics from our program that will play a vital role in the future of Mrnak Genetics.

Beyond our registered Hereford cattle, we manage commercial cows that play a crucial role in our Embryo Transfer program. This initiative produces F1 Baldie heifers and ranch-raised steers that we raise and finish in our feeding program, providing us crucial data to allow us to have first-hand knowledge of how our genetics perform efficiently in the feedlot and how the carcasses perform on the rail.

We take pride in finishing cattle from various sources – whether from our customers or those bred right here on the ranch. Our self-sufficiency extends to our feed and cash crops, producing corn, wheat, barley, canola, and alfalfa planted in the spring.

Our dedicated team, whom we consider family, is vital to our success. Our operation does not function without the dedication and efforts of this group.

The Beefmaker sire group will certainly catch your eye in this year's sale. 250G is a proven herd sire that adds performance and carcass to every calf. While judging the National Pen Show in Oklahoma City, this bull walked into the ring and I knew we had to own him. He leads the Hereford breed in 10 traits and has as much style, power and eye-appeal as any bull walking. His offspring are direct replicas of what we hoped he would produce and his genetics are certain to work in any program in the country. Owned with Stuber Herefords, ND. 4 sons sell.

This Britisher son is a Mrnak raised herd sire. He was first introduced to our junior herd sire program as a yearling and was exclusively used on our top replacement heifers. He is a calving ease sire that is goggled eyed, red to the ground, long bodied and athletic. He is continually used on our top end females and his sons in the sale are sure to follow in his footsteps. 4 sons sell.

718 has proved himself to be one of the most consistent breeding bulls we have purchased. He was successfully used for two breeding seasons on heifers and was then moved to breed our front end females. He sires offspring that are moderate at birth, easy fleshing and attractive. He has been an ideal pasture breeding bull.

4 sons and 1 bred heifer sells.

We had the opportunity to acquire not only 1056J but, his full sister 1144J who is featured on our donor page. These full siblings were purchased with Pelton Herefords of ND. We were very intrigued by the proven horned and polled pedigrees of this mating along with the extremely strong maternal characteristics coupled with the volume, rib shape, and muscle that both of these possess. They are both breeding and raising true to their design and EPD profile and these genetics will have a big impact in our program for years to come. 6 sons and 3 bred heifers sell.

Vaunted is a fully pigmented calving ease sire. He ranks in the top 3% for CE and top 5% for low BW not to mention he is in the top 2% for MCE, top 2% UDDR, and top 4% for teat. He fits perfectly into our program breeding our heifers adding pigment, and tremendous udder quality all in a calving ease package. 3 sons and 1 bred heifer sell.

042 was the high selling bull in our 2022 sale going to CK Cattle of SD. This bull combines the ruggedness, length of body, and muscle shape of 708 and is backed by our cornerstone donor 551. 042 is an extremely attractive bull who is correct in his design, well balanced, big volumed, and has a massive hip. When you combine these attributes with the impeccable maternal strength in his pedigree you get a true breeding bull which we believe his progeny will possess as well. 2 sons sell.

MH Miss Ree Heights 551 has proven to be a "Once in a Generation" female and will continue to plant her roots deeper into our program for years to come. As you will notice, 13 of her sons are in this sale and 11 of them are in the top 20. She is as consistent of a breeder as we have ever produced and she carries power, performance, and style into each of her calves, regardless of the sire that she is paired with. She is a feminine, moderate framed, eye-catching female that has produced over 60 top producing offspring including 25 females that are currently in production at the Mrnak Ranch. We can't say enough about the consistency of this top Donor Cow and we are confident in the quality of calves that her sons will produce for you.

004 comes from CSC Livestock in Sundance, WY. She is an extremely maternally bred female with some of the most notable females in the breed in her pedigree. We also recognize and appreciate the need for additional pigment in the breed and 004 definitely excels in being heavily pigmented and short marked. We are looking forward to her progeny hitting the ground this spring sired by Stanfield, Levitate, and High Noon.

We had the opportunity to acquire not only 1144J from Iron Lake Ranch and Holden Herefords but her full brother Forward 1056J. When we studied the maternal performance and the pedigree we knew this female was special. She intrigued so much that we partnered on her full brother Forward 1056J as well with Pelton Herefords. The proven horned and polled pedigrees of this mating along with the extremely strong maternal characteristics coupled with the volume, rib shape, and muscle that both of these possess, and 1144J's flawless udder made this an easy decision. These genetics will have a big impact in our program for years to come. Her first natural calf sells as lot 27.

6476 has found her way to the donor pen the old-fashioned way- through proof of production over 8 years with her 2023 bull calf as lot 1 of this sale. She is a perfectly balanced female who is correct in her design, big footed, excellent hoof structure, big ribbed, stout hiped, wide pinned, and her udder quality is impeccable. Not always do the EPD profiles translate into the real world, however, in 6476's case in does. She is a trait leader in CE, and low BW, not mention has curve bending EPD's for a 9-year-old cow in maternal excellence. We are looking forward to getting her Stanfield, Forward 1056J, and High Noon progeny on the ground this spring. Son sells as lot 1.

• 3126 earned the lot 1 position not only for his exceptional phenotype and EPD profile but, also for the genetic strength he possesses on both sides of his pedigree. The maternal strength of his mother 6476, our upcoming donor, and the performance of our long-time herd sire Comet 711E gives us complete confidence in the breeding potential this herd bull prospect offers. We have so much confidence that we turned him out with our front-end registered cows.

— Fall Yearling Bulls —

Each year we have been expanding our fall calving program. The Nichols Family in Willow Lake SD works with us to develop and maintain a fall calving cow herd. This has been a partnership that has spanned over the years dating back to 1999. By having both a spring and fall calving herd we can utilize herd sires in both seasons reducing our breeding cost per head as well as producing front end bulls for our customers.

Here at the ranch, we are always in search of new genetics that we can introduce into our operation. We were presented an opportunity from Dean Heins to purchase the entire set of fall born embryo transplant calves last year from Brent Sadler in Oklahoma. When we learned of the matings we didn't hesitate knowing Brent's keen eye for high quality cattle and ability to mate a great one.

This purchase allowed us to expand our fall program with same maternally focused cattle that we strive to produce but, with a different genetic base. We are very excited about this offering of fall bulls and feel when you look them over you will be impressed with the consistency in the type and kind of this uniquely bred set of bulls. Because of these exceptional herd bull prospects, we may retain an interest in one or more of these bulls. Terms to be announced sale day.

Flush Brothers - Lots 96-99

This elite set of full brothers excites us from many angles whether it be their elite phenotype, tremendous mass, or their soon to be well known dam who has 6 generations of Holden Hereford donor dams just on the bottom side of their pedigree. The consistency and very high level of quality exemplified in this flush is like no other mating we have seen. Each one of these full brothers have the ability to leave an unmistakable positive impact for any serious producer. These are truly some of the best bulls that have ever stepped foot on this ranch and out of one of the best Hereford cows ever produced.

Flush Brothers - Lots 100-101

You will notice a theme with these fall bull matings. These full brothers out of 4123B are similar to the 0108H brothers in that their dam also sold as a yearling heifer and goes back to one of Jack Holden's favorite cows 1028L. 4123B possess excellent udder quality, is very stout, and is back by generations of Holden donors. These bulls are extremely balanced, eye-catching bulls, with remarkable athleticism in a muscular package that have the herd bull look.

MS WORLD 515H
DAM OF LOT 102

515H was the pick of the herd by Sadler Ranches from the Topp program. She has as much body and fleshing ability as any of the donors referenced in the fall division. Take note, her above picture was taken as a first calf heifer. She transmits this extra body, look, udder quality, as well as calving ease to her progeny.

- Fall Yearling Bulls -

- Matrons in the Making -

Since the initiation of the "Matrons in the Making" sale at Mrnak Ranch in 2020, we have been meticulously choosing top-tier females from our program and making them available to producers worldwide. Again, this year we have decided to feature the Hereford bred heifers in our production sale.

Highlighted below are 15 elite females that reflect our "Matrons" program. These bred heifers were selected out of donors, distinguished cows along with offspring out of our best young females. Collectively, this group possesses a combination of structural soundness and broody maternal excellence, with generations of stacked maternal genetics in their pedigrees

- Out of a neat uddered Sensation granddaughter, 3290 has plenty of maternal strength packed in her pedigree to be a front pasture type of a female.
- Top 15% in the breed for WW
- Top 20% in the breed for M&G
- Top 25% in the breed for YW
- Pasture exposed to HH 2188 and HH 2216 due 3/20/25

— Commercial Females —

We take great pride in presenting this exceptional collection of F1 Black Baldy heifers, sourced from some of the finest cattle operations in our area. This year's offering comes from Marc Fridley; Ryan & Ashley Rebel; John Olinger; Eric and Andrea Bowman; Ron & Shirley Buckman, Rourke & Rhonda McPeters; and Ernie & Nell Buckman. We are sincerely thankful for their partnership, and we eagerly anticipate continued collaboration in the years to come.

These top-tier replacement heifers represent a culmination of quality breeding and dedication to the industry from each of these respected operations. All the heifers are bangs vaccinated, calf-hood vaccinated, poured multiple times, and fertility inspected to ensure that they will be sound breeders. All the heifers will be inspected and culled for disposition, markings, and uniformity.

Fridley Ranch — 35 Head | Marc Fridley: 701-290-3971

Marc and his family's operation is located north of Taylor North Dakota. The Fridley's have purchased multiple front-end bulls from us over the years. The Fridley's run a medium-large framed Angus based female herd with genetics coming from some of the area's top seedstock operations. The Hereford bulls that have been selected from our production sale have been performance as well as maternally based herd bulls. The baldy heifers were born April-May and are not carrying a brand. This herd consistently weans calves over 600 lbs and produces some of the most sought-after baldy steers in the area. 35hd weighing 750 lbs.

Ryan and Ashley Rebel — 35 Head | 701-290-3911

The Rebel's operation is located NW of Richardton on some of the most scenic landscape in western ND. This is a productive cow herd consisting of 100% Hereford cows that have been in production and expanded on for over 100 years. The Rebel's have purchased breeding stock from us building cow numbers to where they are today. Dohrmann Cattle Company has been the source of the Angus herd sires for Ryan and Ashley. The heifers are born the last few days of March through April. This set of heifers weaned off at 605lbs with no creep and high-end mineral. Since weaning the heifers have been on a low energy diet to promote longevity and are fully vaccinated on the Zoetis program. This is a unique opportunity to acquire F-1 females out of one of the premier commercial Hereford cow herds anywhere. 35 hd weighing 750lbs.

John Olinger — 60 Head | 605-770-6474

John Olinger and his family run an expansive cow calf operation in central South Dakota. John recognizes the benefits of Mrnak Hereford heterosis and has sourced a large number of bulls to capitalize on maternal performance on his predominantly black cow base. The F1 heterosis is especially evident in the large number of cattle that he sells, feeds, and finishes every year. This set of 60 head of uniform unbranded heifers were born March through April and will weigh 725 lbs.

— Commercial Females —

Eric and Andrea Bowman — 25 Head | 701-440-0278

The Bowman Family have been using bulls from us to utilize heterosis on both commercial and registered Angus females. They predominately raise Registered Angus Cows and sell an outstanding set of yearling Angus bulls in February. These heifers were born March-April and will weigh 775lbs and will not be carrying a brand. Bowmans host their Annual Production Sale on Thursday, February 6th at the ranch 1 mile south of Rhame North Dakota

Ernie and Nell Buckman — 25 Head

Ernie and Nell run a cow-calf operation north of Belfield, North Dakota. Their cow herd consist of a uniform set of Angus females. The Buckman's run a moderate cowherd with emphasis on disposition, fleshing ability and longevity. Ernie and Nell select Hereford bulls with abundance of pigment, calving ease and superb dispositions. Once again, the steer mates to these heifers are on feed here at the ranch. Last year was our first year finishing the steers from this ranch and the results couldn't have been better. These heifers were born March-April, will weigh 750lbs and are not branded.

Ron and Shirley Buckman | Rourke, Rhonda and Sutton McPeters — 105 Head

The Buckman family has entrusted us for many years sourcing genetics from our ranch that complement the success of theirs. Ron and Shirley live near South Heart, North Dakota and, along with Rourke, Rhonda and Sutton run cows east of Fairfield, North Dakota. This set of heifers were born predominately in April. The Buckman's run both Hereford and Angus cows and separately breed them to make front end F1 baldies. Ron has sourced many of his Hereford cows as bred females from here on the ranch and uses front end bulls to produce a high quality F1 calf crop. These heifers will weigh around 725 lbs and are carrying a brand.

Mrnak Ranch – 85 Head

This set of baldy heifers are born out of cows in our ET recipient program that don't get an embryo. The heifers are all out of home raised Angus cows or purchased Angus female from the Katus Ranch in Watauga SD. These heifers are out of Hereford herd bulls that we move to our commercial herd after they are done being utilized on registered cows. Most of these females are born April-early May. They are not branded and will weigh around 750 lbs.

— Charolais Offering —

Although we are 100% committed to continually build our Hereford Program, we have found an appreciation of what the Charolais breed has to offer. We have taken a serious approach to expanding our Charolais cow herd buy purchasing new genetics from sales across the United States and Canada. This year we retained 100% of our females and increased the number of embryos we put in here at the ranch.

Our first crop of Charolais cross calves continued to meet or exceed the benchmarks along the production cycle: They calved easy; they weaned heavy; and once off the cow continued to gain. When we harvested those cattle this year out of our home raised females at the ranch these calves exceeded in all the factors we believe in when feeding cattle: time on feed, conversion, and health. The hybrid vigor of this cross complements the Hereford-Angus cross perfectly.

As in the Hereford breed, we believe great bulls are backed by great cows. We believe we have some of the best cows in the Charolais breed producing some great Charolais bulls. Either before or after the sale we invite you to stop by the ranch to view these great females and the sons they produced for our Private-Treaty Charolais bull offering.
